

## Varzene Metal, strategic production facility

15 August 2012

With an investment of nearly EUR 5 million, Varzene Metal has constructed a facility making cold drawing process in stainless steel, titanium and special alloy steel in Turkey. The company, which serves the automotive, medical, marine and petro-chemistry sectors and defense industry commissioned its cold drawing and bright steel producing facility in July 2012. With this facility, the company will be able to produce diameter, flat, square and hexagonal size steel by cold drawing special stainless steel, special alloy steel, special tool steels, nickel alloys, valve steels, medical steels and titanium alloys.
